

InfraThrone CoreOps (Week 1 Daily Module)

Theme: Linux + K8s Foundations for Outage Handling

Each day contains:

1. **What to Study**
2. **What to Practice (Hands-On)**
3. **Where to Study (trusted & curated)**
4. **InfraThrone Mindset Notes**

DAY 3: Kubernetes Pod Lifecycle Mastery

1. Concepts to Study

- Pod lifecycle phases
- Container lifecycle
- Init containers
- Liveness vs readiness probe
- Events → how Kubernetes communicates problems
- Image pull mechanism
- CrashLoopBackOff logic

2. Hands-On

Deploy a pod and break it intentionally: `kubectl run test --image=nginx || kubectl describe pod test || kubectl logs test`

Break Examples:

- Wrong image tag
- Wrong command
- Health check failing

3. Where to Study

- Kubernetes docs (Workloads → Pods)
- Nigel Poulton K8s crash course (free parts)

4. InfraThrone Mindset

“Pods don’t break randomly. They break *predictably*. Learn the patterns.”
