

InfraThrone CoreOps (Week 1 Daily Module)

Theme: Linux + K8s Foundations for Outage Handling

Each day contains:

1. **What to Study**
2. **What to Practice (Hands-On)**
3. **Where to Study (trusted & curated)**
4. **InfraThrone Mindset Notes**

DAY 7: Mini Outage Simulation + Reflection Session

1. Concepts to Study

- Combine everything learned
- Pod → Node → Network → Observability → Linux

2. Hands-On Mini Lab

Break and fix:

- Pod not starting
- Service unreachable
- Node resource exhaustion
- DNS failing
- CrashLoopBackOff

Let them debug without hints.

3. Reflection Worksheet

Questions:

- What was the failure?
- Which assumptions were wrong?
- What was the clue?
- What command exposed it?
- What is the pattern here?

4. InfraThrone Mindset

“Outages are not technical events. They are *pattern recognition exercises*.
The best engineers don’t fix faster; they see patterns faster.”
